Swindon, SN1 2AB

Profile:

I am a motivated, reliable, and professional individual with experience in customer-focused and general workplace environments. I possess strong organisational, communication, and time-management skills, enabling me to work effectively and maintain high standards, even under pressure. I am recognised for my dependability, punctuality, and proactive approach to work. Equally comfortable working independently or as part of a team, I take responsibility for my duties and consistently strive to contribute positively to the workplace. I am committed to continuous learning and professional development, and I am always eager to develop new skills and broaden my experience.

Academic Projects:

MediTrack – Medication Reminder Application

- A university software engineering project which is designed to help users manage and track medication reminders efficiently. The application allows users to add and organise medication details, helping improve consistency and reduce the chances of missing doses.
- The project was developed using object-oriented programming principles and focuses on clean code structure, basic data handling, and user-focused design. It demonstrates core software development skills including problem-solving, debugging, and application design.

Key Features:

- Add, View, Edit and Delete Reminders
- Add Medicines to Inventory
- Check Medical Records
- Search for Nearby Pharmacies
- Export Medical Records into a PDF
- Clean and Simple User-Interface

Technologies & Skills:

Java, Kotlin, XML, Android Studio, GitHub, Object-Oriented Programming (OOP), Software Development Principles, Application Testing, Debugging, Data Management, and Mobile App Development.
